Overview

Managing users and services has become easier than ever for your organization's Web Administrators. MUFG Bank MUFG Exchange features streamlined everyday user access, administration, and account management tasks, giving you the power to make decisions and expedite changes quickly online.

- Enroll users for new services online.
- Make decisions about who has access to which services.
- Set up new users and/or delete users to accommodate changes in staff.
- Lock out or reset tokens and manage user security settings.
- Quickly access a 90-day history of service requests.

All of these tasks can be accomplished easily through the Administration Console, which is available to Web Administrators.

Using the administrative and management features of MUFG Exchange requires the role of Web Administrator to one or more individuals on your staff. The chart below provides examples of key stakeholder roles and responsibilities.

Web Administrators	Users
Designated employees who can manage employee access to online services and perform the day-to-day activities.	Employees of the company.
<ul style="list-style-type: none">• Manage user accounts• Create new users access and assign to services• Manage security tokens	<ul style="list-style-type: none">• Granted access to use specific online services with entitlements as defined by Web Administrators.

Communicating securely with MUFG Bank

The Message Center is the fast, convenient way to receive, send, and view confidential messages online. It is the only secure method for sending messages and documents directly to customer service.

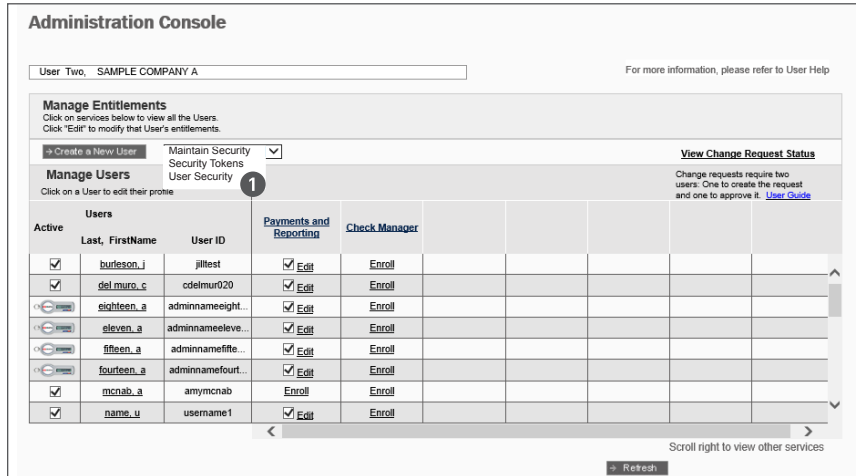

FOR MORE INFORMATION

If you have questions, please contact customer service at: **844-544-0387**, Monday through Friday, excluding federal holidays, 8:00 a.m. to 7:00 p.m. ET.

Change Security Settings

The user security settings feature allows you to easily manage the automatic expiration of user access and lock inactive users. These settings can be modified at any time, and changes will take effect immediately.

- 1 On the Administration Console, select **User Security Settings** from the Maintain Security drop-down.

Manage User Access

It's easy to manage user access to MUFG Exchange day or night, seven days a week, in a safe, secure* environment.

Access the Administration Console

Sign on to MUFG Exchange at <https://sso.mufgamericas.com/login/auth>.

- 1 Click the  icon located at the top right side of the menu bar.
- 2 Select **Administration Console** from the drop-down menu.

- 3 This will take you to the **Administration Console** Welcome page.
- 4 Select the check box to bypass the Welcome Page, if applicable. If checked future logins will take you directly to the Administration Console page.
- 5 Click Continue.

*To enhance security for your accounts, MUFG Exchange requires 1024-bit encryption.

Manage User Access

From the Administration Console page, you can create new users, manage users' access, edit profiles, delete users, and reset passwords.

Create a new user

- 1 On the Administration Console, click **Create a New User**.

The screenshot shows the Administration Console interface. At the top, there's a header 'Administration Console' and a search bar containing 'User Two, SAMPLE COMPANY A'. Below this is a 'Manage Entitlements' section with a red circle '1' around the 'Create a New User' button. The main area is titled 'Manage Users' and contains a table of users. The table has columns for 'Active', 'Last, FirstName', 'User ID', 'Payments and Reporting', and 'Check Manager'. The first row shows a user named 'burleson_j' with User ID 'jilltest' and 'Enroll' buttons for both 'Payments and Reporting' and 'Check Manager'.

- 2 Enter the required information.
- 3 Designate the user as either a Web User or Web Admin. Web Admins have the authority to add/delete/edit user profiles and to manage tokens.
- 4 Select the Language preference.
- 5 Click **Submit** to complete the request.

Note: We highly recommend selecting the check box for high risk transactions to receive email notifications.

The screenshot shows the 'Create a New User' form. At the top, there's a search bar with 'User Two, SAMPLE COMPANY A'. Below this is a message: 'Please complete the information below and click 'Submit' to create a new User. You can enroll the new user in each service individually. * Denotes a required field.' The form fields are: User ID (sampleuserid), First Name (Sample), Middle Name, Last Name (User), Work Number (999, 999, 9999), Mobile 1, Email (sample@email.com), and Confirm Email (sample@email.com). There are three red circles: '2' around the User ID field, '3' around the User Type (Web Admin selected) field, and '4' around the Language (English selected) field. A 'Send High Risk Transactions email' checkbox is checked. At the bottom, there are buttons for 'Admin Console', 'Reset', and 'Submit'.

Manage User Access

Edit user profiles and reset tokens

- 1 From the Manage Users section of the Administration Console, click the **Last, FirstName** of the user whose profile and/or token you want to change. This will bring you to the Edit User Profile page.
- 2 Click **Edit User Info**. Update the user's profile by entering new information where needed.
- 3 Use the Security Maintenance section to lock or unlock the user's access, manage user phones, assign security tokens, and permanently delete users.

A user's access can also be disabled or enabled from the Administration Console by respectively removing or adding a check mark under the Active column.

Manage User Access

Delete users permanently

Deleting users permanently is appropriate if individuals leave the organization and you no longer need to use their profile to create new users.

- 1 On the Administration Console, under the Manage Users section, click the name of the user you want to delete.
- 2 On the Edit User Profile page, in the Security Maintenance section, select **Permanently Delete User**.
- 3 Click **Delete**, and you will receive a confirmation.

Note: Once you permanently delete a user, that user will be removed from the system and cannot be automatically reinstated.

MUFG Exchange Token Management Overview

A token is a device that is assigned to a specific user in order to provide additional security for authenticating user access to MUFG Exchange. A **token passcode** is used in place of a static password to sign onto MUFG Exchange.

The **token passcode** consists of two components:

- 1 A password, *plus*
- 2 The random 6 digit number displayed on the token, which changes every minute.

SecurID Token

NOTE: The bars next to the SecurID token indicate the time remaining before the currently displayed number is refreshed to reveal a new number. If there is only a single bar displayed, wait for the number to change and then enter the new number to create your password.

Web Administrators* have the ability to manage user entitlements and tokens easily using the **Administration Console** within MUFG Exchange. Entitlements include:

- Assigning tokens
- Re-assigning tokens
- Enrolling for tokens for MUFG Exchange sign on
- Removing a tokens requirement for MUFG Exchange sign on
- Locking a user's token
- Unlocking a user's token
- Resetting a user's token
- Ordering tokens

**These features are only available to Web Administrators who are currently using tokens in MUFG Exchange.*

Token Management

The Token Management page provides a consolidated status of user entitlements for tokens as well as detailed log information. To access Token Management*:

- 1 Sign On to MUFG Exchange.
- 2 Go to the **Administration Console**.
- 3 Select **Security Tokens** from the drop-down menu.

* This will only be shown if you are a Web Administrator currently using a token in MUFG Exchange

Assigning Security Tokens

To assign a security token to a user:

- 1 Sign On to MUFG Exchange.
- 2 Go to the **Administration Console**.
- 3 Select user profile from the **Manage Users** section.

The screenshot shows the Administration Console interface. At the top, it says "User Two, SAMPLE COMPANY A". Below that, there are sections for "Manage Entitlements" and "Manage Users". The "Manage Users" section is highlighted with a circled '3'. It contains a table of users with columns for "Active", "Last, FirstName", "User ID", "Permissions and Reporting", and "Check Manager". The table lists several users, including "burleson_j", "del_murp_o", "stolteen_a", "stevon_a", "fitzen_a", "fourteen_a", "mcnab_a", and "name_u". Each user has an "Enroll" button next to their name. A "Refresh" button is located at the bottom right of the table.

- 4 Click on **Assign Security Token**.

The screenshot shows the "Edit User Profile" page for "Web Administrator, SAMPLE COMPANY". The page displays user information such as "User ID: sampleuserid", "Last Valid Login", "Last Contact Info Review", "First Name: Sample", "Middle Name", "Last Name: User", "Email Address: sXXXXe@email.com", "Send High Risk Transactions email: Yes", "Notify user by email about offers, promotions, and new products: No", and "User Type: Web Admin". On the right side, there is a "Security Maintenance" section with a "Challenge Questions Status: Inactive" and a "Last Challenge Questions Change:" section. Below this, there are buttons for "Manage User Phones", "Lock User Access", "Assign Security Token", and "Permanently Delete User". The "Assign Security Token" button is highlighted with a circled '4'. A note at the bottom right states: "Note: Once a User is permanently deleted, their entitlements cannot be copied to another User." An "Admin Console" link is at the bottom right.

- 5 The **Assign Security Token** screen will pop up.
- 6 Add the assigned token's serial number.
- 7 Click **Assigned**.

The screenshot shows the "Assign Security Token" dialog box. It displays "User ID: sampleuserid" and a "Token serial number:" field with a dropdown arrow, highlighted with a circled '5'. Below the field is a checked checkbox labeled "Use Token for Login Authentication" with an information icon. At the bottom, there are "Cancel" and "Assign" buttons, with the "Assign" button highlighted by a circled '6'. A circled '7' is located at the bottom right of the dialog box.

- 5 Select a token serial number from the drop down menu in the pop-up window

The list of token serial numbers is based on the number of tokens that the Bank has sent to your company that have not been assigned to any users. If there are no token serial numbers in the drop down, contact MUFG Bank to order additional tokens.

- 6 Click **Assign** and a confirmation message will display.

Assign Security Token

User ID: **sampleuserid**

Token serial number :

- 111111111111
- 222222222222
- 333333333333
- 444444444444

Cancel → Assign

- 7 The user is now assigned a token.

Assign Token Confirmation

User ID : **sampleuserid**

Token Serial Number : 555555555555

OK

Editing Security Token Entitlements

To edit security token entitlements:

- 1 Sign On to MUFG Exchange.
- 2 Go to the **Administration Console**.
- 3 Select user profile from the **Manage User** section.

If you need to delete a user with a security token from MUFG Exchange, the token must first be removed or unassigned. This requires a two-step process in order to ensure that the token can be reassigned, and your token inventory is correct.

Step 1: Un-assign security token from a user

- 1 Sign on to MUFG Exchange.
- 2 Go to the **Administration Console**.
- 3 Select user profile from the **Manage User** section.
- 4 Click **Edit Security Token**.
- 5 Select **Un-assign token**.
- 6 Click **Update** and a confirmation message will display.

Step 2: Delete User Profile

- 1 Go to the **Administration Console**.
- 2 Click on the user name to be deleted.
- 3 On the **Edit User Profile** page, click on **Permanently Delete User**.

MUFG Exchange IP Address Restriction Overview

MUFG Exchange can be configured or restricted to accept 'sign-ins' from your users only if they originate from an IP address that is on an approved list of addresses. This feature is called IP Address Restriction.

If your company utilizes known IP addresses to access the Internet, then IP Address Restriction can be utilized as an additional security feature that will prevent any user from signing into MUFG Exchange from any IP address other than your own.

This guide contains easy to follow instructions, and also informs you on how to exempt specific users from this restriction (due to traveling and other needs).

IP Address Restriction

To access the IP Address Restriction Page:

- 1 Sign on to MUFG Exchange.
- 2 Click on the **Administration Console**.

The screenshot shows the MUFG Exchange interface. At the top, there is a navigation bar with 'Payments & Transfers' and 'Reports'. A dropdown menu is open, showing 'Administration' as the selected option. The dropdown menu lists several options: Administration Console, User Maintenance, Alert Center, Contact Center, Import, Preferences, and Audit Information. In the background, there are sections for 'Action Items' (ADMINISTRATION: 2, PAYMENT: 20) and 'Balances' (Total Balances: USD \$14,687,470.89).

- 3 Click **Maintain Security** from the drop down box.
- 4 Select **Manage IP Address Restrictions**.

The Company IP Address Restriction page controls the use of this feature and allows you to enter and update your list of IP addresses.

This page allows you to;

- 1 Turn IP Address Restriction On
- 2 Turn IP Address Restriction Off
- 3 Add, change, or delete individual IP addresses

If you turn off IP address restriction, MUFG Exchange will automatically save your addresses, which can be activated by turning this feature back on.

Note: An asterisk can be used to indicate a range of numbers in the quartiles.

- 4 When you make changes on this page click **Submit**. If you have a token, you will be requested to enter your token passcode. Once this is validated you will receive a confirmation page of your changes which will be implemented immediately.

Company IP Address Restriction

Web Administrator, SAMPLE COMPANY

As an additional security feature, your online users can be restricted to accessing the **Financial Center** from only the Internet Protocol (IP) addresses that your company uses to connect to the Internet.

Please select 'Turn On' to activate the IP Address security setting.

2 Turn **Off** IP Address Restriction i

1 Turn **On** IP Address Restriction

Then enter the permitted IP addresses below, and then click on 'Submit'. To remove an address, remove the checkmark beside the address. (To enter in a range of addresses, use an asterisk in the address, i.e. xxx.xxx.xxx.*)

IP Address	3	Add/Remove
<input type="text"/>	<input type="text"/>	<input type="checkbox"/>
<input type="text"/>	<input type="text"/>	<input type="checkbox"/>
<input type="text"/>	<input type="text"/>	<input type="checkbox"/>
<input type="text"/>	<input type="text"/>	<input type="checkbox"/>
<input type="text"/>	<input type="text"/>	<input type="checkbox"/>

Click [here](#) if you need to add more addresses.

The IP addresses entered will only be active if 'Turn On' is selected.

Note: This security feature is recommended only if you can provide a definitive list of externally-facing IP addresses. Users who access the Financial Center using several different workstations in your office, with a wireless device such as an "aircard" or from a hotel or offsite connection when travelling, will not be able to use this feature.

Such individual users can be exempted from using these IP addresses by accessing the user's profile from the Administration Console, and adding a check mark to the "Exempt this user from any IP address restrictions" feature.
