AI Adoption Becoming Mainstream Across Business

According to a new "Business Spend Signals" report from Ramp, non-tech industry sectors are seeing outsized gains in AI utilization, a sign of the rapid mainstreaming of AI tools across the corporate world. Half of small businesses, and 2/3 of medium and large-size businesses, currently have paid subscriptions for AI models, platforms and tools.

Share of US businesses with paid subscriptions for AI tools, by business size

Non-Tech Sectors Closing the Gap on AI Adoption

Ramp's new report on AI adoption emphasizes the growth of AI across non-tech sectors. While tech still leads in paid AI services, other non-tech sectors are closing the gap quickly. Manufacturing currently leads in the pace of adoption gains, with construction, healthcare, finance and insurance close behind.
